My Mission

As your next County Supervisor for El Dorado County District 2, I will bring the following qualities to the job that are so desperately needed:

- **Problem Solving**

In today's world, there is absolutely zero value in simply pointing out problems. The value is in finding and implementing ways to fix them.

- **Experience**

Through my positions working in a supervisory position with the FAA, as a business owner (starting with a single location and growing to four), and as the President of the Cameron Park Community Services District, I have learned much about community activism and know how to work with the public.

- **Dedication**

As an Air Force brat, I had the chance to grow up living all over the world. As I started my family, I knew that El Dorado County is the best place in America for my wife and I to raise my two daughters. I am proud to live here, and plan to remain for the rest of my life. I have no aspirations of higher office, and wish to represent the people of El Dorado County for as long as they'll have me.

In conclusion, I will bring a proven track record of a common sense approach to problem solving, and of implementing effective solutions to the problems of today.

Scott McNeil:

El Dorado County Deserves Better.

Common Sense Solutions For El Dorado County's Problems

My work as a local restaurant owner prompted me to get involved with the county and serve with the Cameron Park Community Services District. In that role, I realized that I could truly effect positive solutions for our county through representation. I was prompted to really get involved, learning about the issues facing our area and talking with my fellow El Dorado County residents to learn more about their concerns and needs.

As President of the Cameron Park CSD, I saw firsthand how today's leaders need to be able to reject the status quo and finally apply some **common sense** to solving our problems.
